

Practice math to get prizes like Pokemon, Legos, video games and more.

## Adding & Subtracting Fractions with Different Denominators

1  $\frac{3}{3} + \frac{2}{4} =$   $\frac{1}{3} + \frac{4}{3} =$

2  $\frac{1}{4} + \frac{2}{4} =$   $\frac{3}{3} - \frac{4}{3} =$

3  $\frac{4}{3} + \frac{3}{3} =$   $\frac{4}{4} - \frac{2}{4} =$

4  $\frac{4}{4} - \frac{5}{8} =$   $\frac{2}{4} + \frac{1}{5} =$

5  $\frac{7}{8} - \frac{2}{8} =$   $\frac{2}{5} - \frac{4}{4} =$

6  $\frac{5}{8} + \frac{3}{4} =$   $\frac{7}{6} - \frac{6}{6} =$

7  $\frac{8}{10} - \frac{6}{10} =$   $\frac{4}{3} + \frac{7}{8} =$

9  $\frac{9}{10} - \frac{9}{10} =$   $\frac{4}{3} - \frac{7}{6} =$

10  $\frac{3}{5} + \frac{5}{10} =$   $\frac{2}{6} + \frac{3}{12} =$

11  $\frac{5}{5} - \frac{9}{10} =$   $\frac{6}{3} + \frac{7}{9} =$

12  $\frac{8}{8} - \frac{5}{7} =$   $\frac{1}{10} + \frac{10}{3} =$

13  $\frac{9}{4} + \frac{9}{2} =$   $\frac{10}{10} - \frac{7}{5} =$
